Note:

- 1) 33x; 347 (PN); 588 (PN); 776 (PN); 856 (PN)
- 2) 505--The policy for this LC core relationship generally is to give a MARC 505 contents and at least one 7XX analytical authorized access point. If the contents are already indicated elsewhere in the description (e.g., in the 245 field), a contents note is not necessary; if there are TOO MANY works in the compilation, you can omit the contents note. LCPS 25.1 indicates when an analytical authorized access point doesn't need to be given for the first or substantial work in the compilation.
