語意網概論

語意網 (Semantic Web)

- ▶ 語意網即是建構一個基礎建設，在這基礎建設下賦予資訊明確的定義，使得電腦能夠理解富含語意的文件和資料，從而促成電腦與人們的協同工作
- ▶ 以電腦能夠理解的方式來描述任何具體或抽象、實體或虛擬事物(thing)的屬性(property)，以及事物間的關聯(relationships)
 - ✿ The Beatles was a popular band from Liverpool.
 - ✿ John Lennon was a member of the Beatles.
- ▶ 鏈結資料是實現語意網的最佳實務

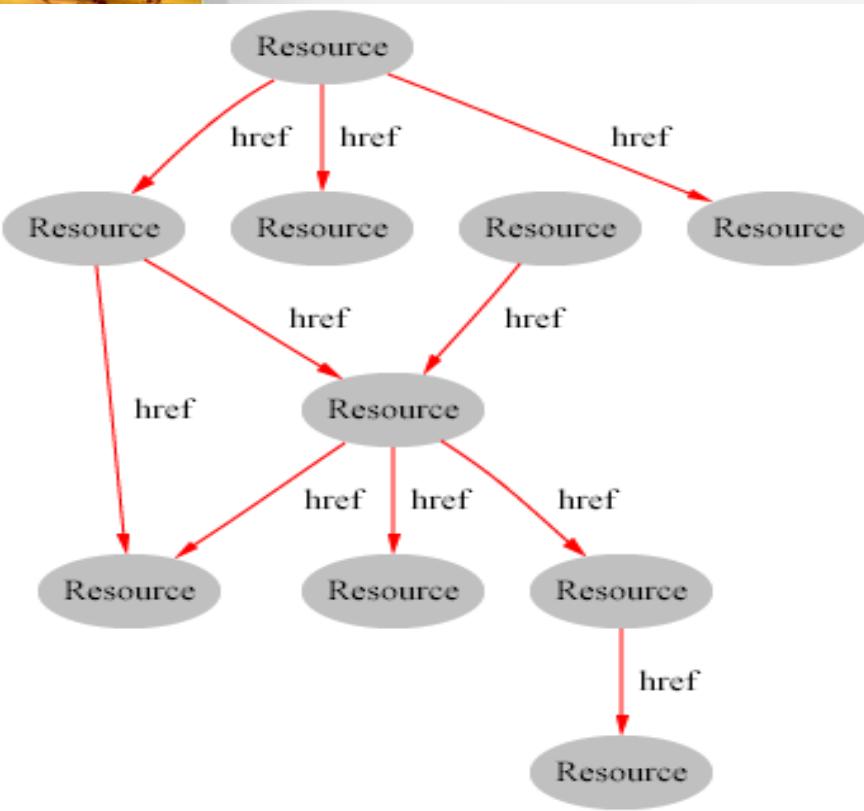

Original Web Proposal to CERN

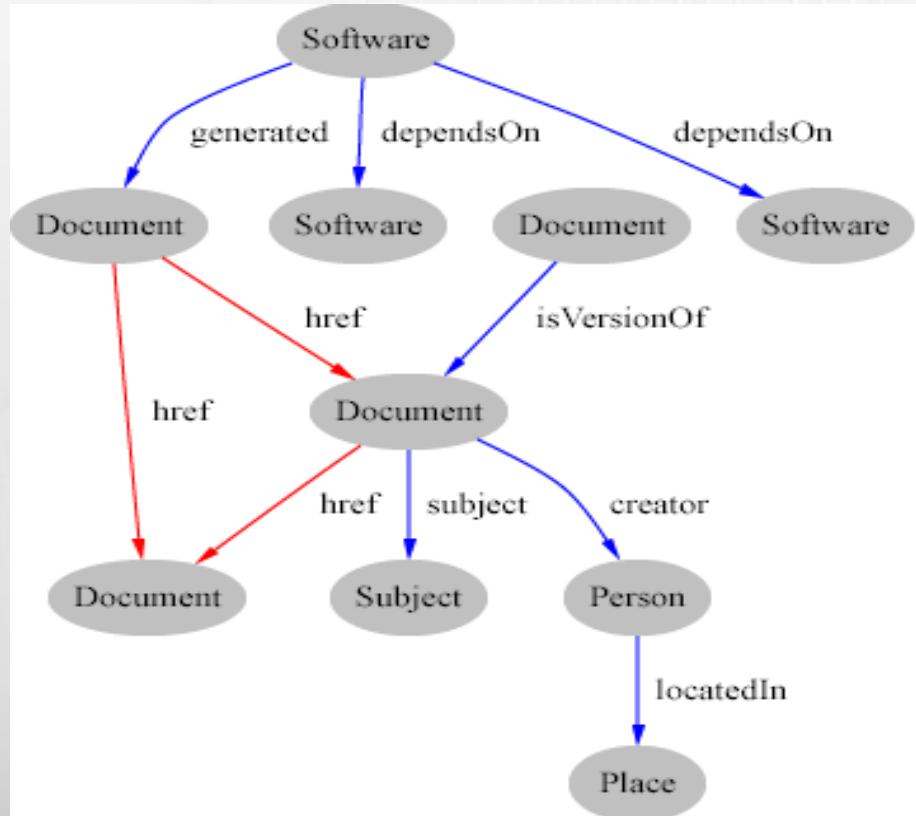

Encompass additional metadata above and beyond what is currently in the Web. This additional metadata is needed for machines to be able to process information on the Web

Web vs. Semantic Web

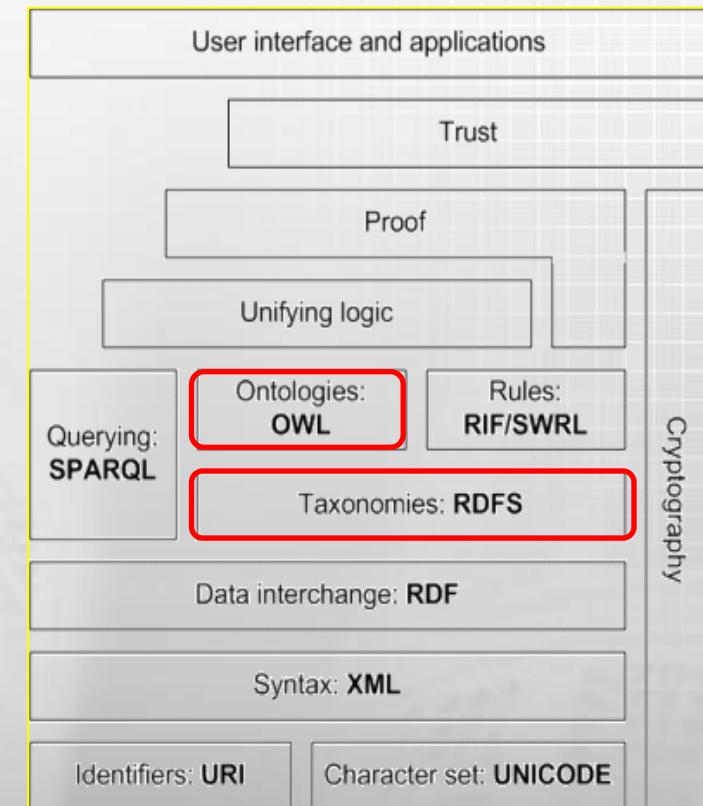

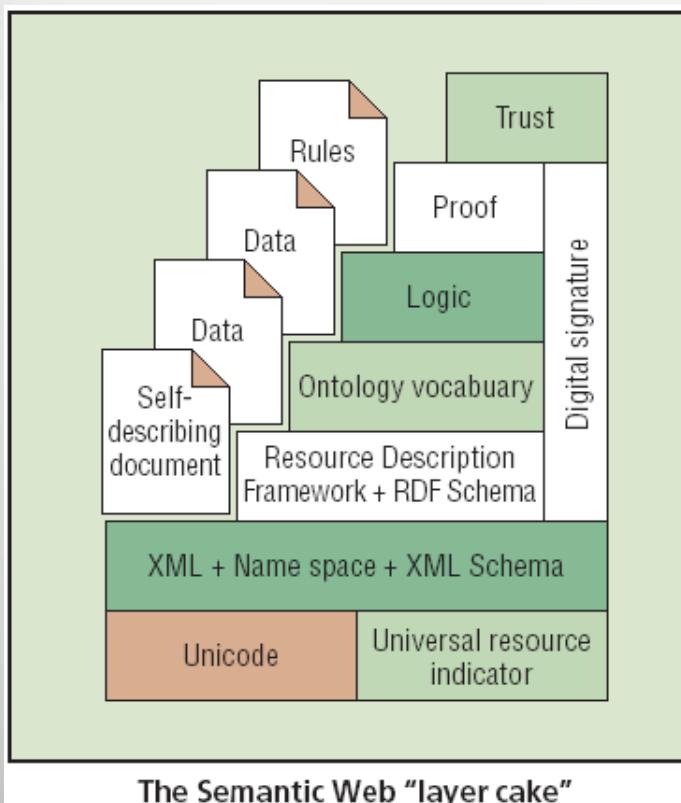

Web

Semantic Web

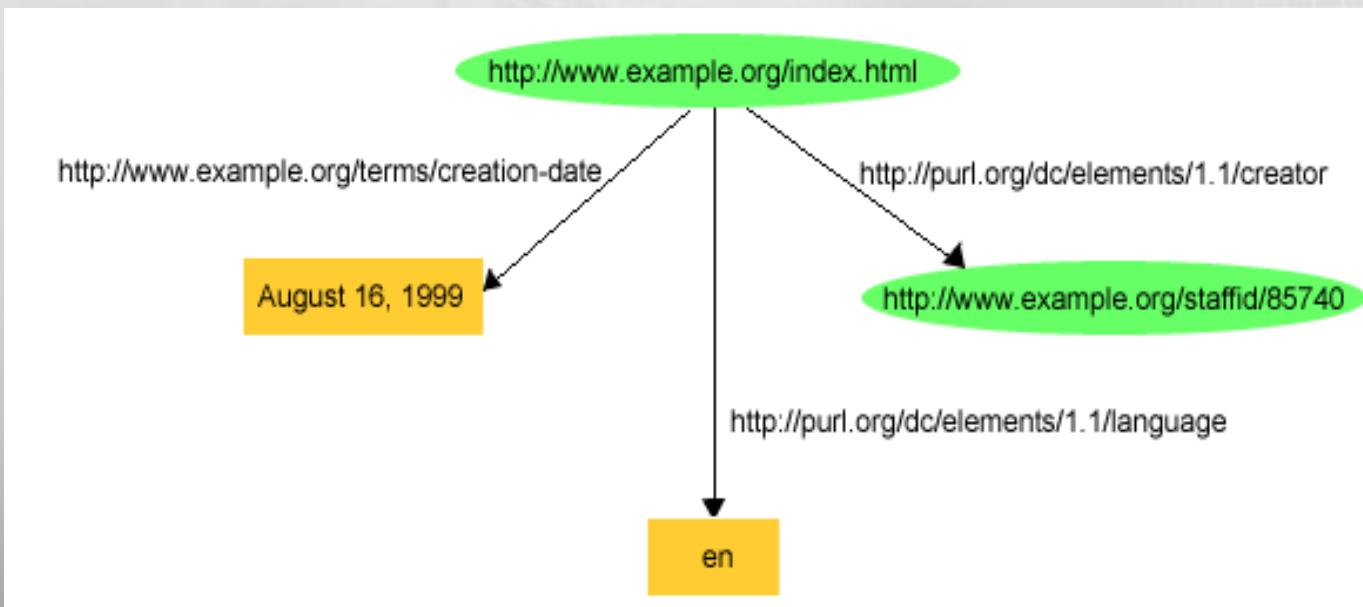

What achieves the Semantic Web?

http://en.wikipedia.org/wiki/Semantic_Web_Stack

Basic RDF Model

- ▶ A model for describing
 - ✿ resources
 - ✿ named properties
 - ✿ property values
- ▶ (resource, property, value)

Triple Notation

► Triple Notation of Example

- ✿ <http://www.example.org/index.html>
 <http://purl.org/dc/elements/1.1/creator>
 <http://www.example.org/staffid/85740> .
- ✿ <http://www.example.org/index.html>

- ✿ <http://www.example.org/index.html>
 <http://purl.org/dc/elements/1.1/language> "en" .

► Shorthand Triple Notation – Giving prefix (Namespace)

- ✿ ex:index.html dc:creator exstaff:85740 .
- ✿ ex:index.html exterm:creation-date "August 16, 1999" .
- ✿ ex:index.html dc:language "en" .

鏈結資料定義與原則

<http://linkeddatabook.com/editions/1.0/#>

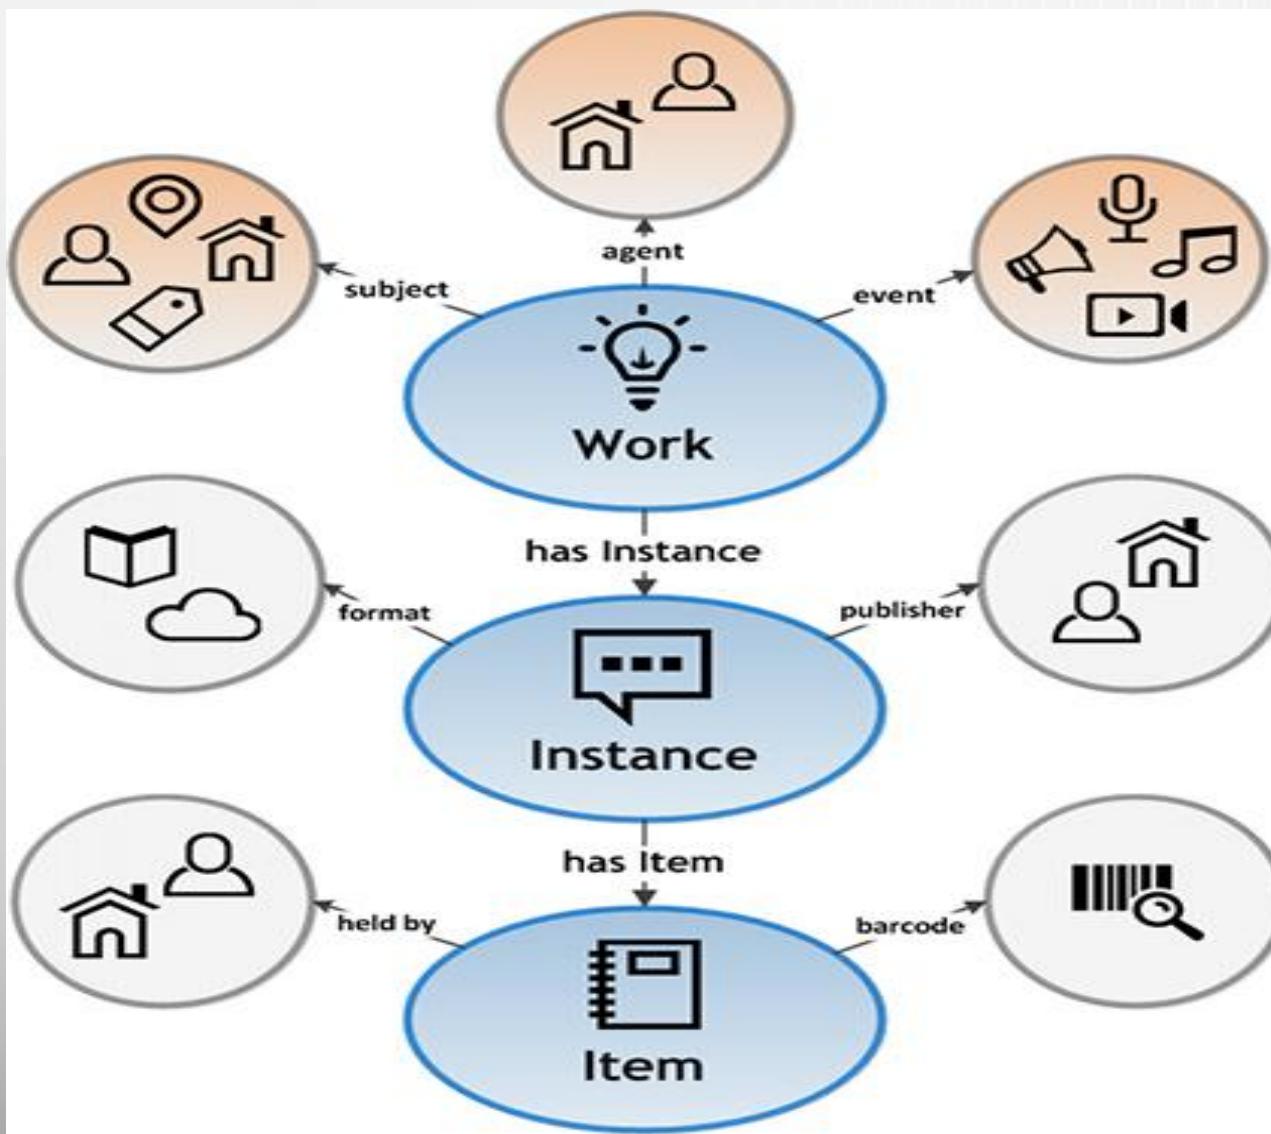

鏈結資料 (Linked Data)

- ▶ 實現語意網的最佳實務
- ▶ 用來將結構化資料發布於Web上，並加以串聯
 - ✿ 支持資源的發現、取用、整合
- ▶ 鏈結資料四原則
 - ✿ 利用URI為資源或事物命名
 - ✿ 以HTTP做為客戶端和伺服器端之間查詢及傳送URI的機制，用以查詢特定URI所代表事物的相關資訊
 - ✿ 伺服器端使用RDF與SPARQL等標準，提供更多的資訊
 - ✿ 對於特定URI所代表事物的相關資訊中，應包含與其他相關事物的連結(連結到該事物的URI)，使得事物間得以串連，以達成構築全域資料空間的目標

BIBFRAME Model

Items, Things, Resources

- ▶ To publish data on the Web, the **items** in a **domain of interest** must first be identified
 - ✿ **Things** whose properties and relationships will be described in the data
 - ✓ Web documents, real-world entities, abstract concepts
 - ✿ **Resource** is used to refer to these *things of interest*, which are, in turn, identified by HTTP URIs

RDF in XML format

Making URIs De-referenceable

► De-referenceable

- ❶ HTTP clients can look up the URI using the HTTP protocol and retrieve a description of the resource that is identified by the URI
 - ✓ Resources can be classic HTML documents, real-world objects and abstract concepts

► Descriptions of resources are embodied in...

- ❶ HTML: read by humans
- ❶ RDF data: read by machines

► HTTP content negotiation

- ❶ Clients send HTTP headers with each request to indicate what kinds of documents they prefer

Providing Useful RDF Information

► RDF Data Model

- ✿ Triple: Subject, predicate, object
 - ✓ Two principal types of RDF triples
 - ✿ Literal triples
 - ✿ RDF links
- ✿ RDF Graph

► RDF Serialization Formats

- ✿ RDF/XML
- ✿ RDFa: embed RDF triples in HTML documents
- ✿ Turtle
- ✿ N-Triples
- ✿ RDF/JSON

Including Links to Other Things

- ▶ Set RDF links pointing into other data sources on the Web
 - ✿ Glue that connects data islands into a global, interconnected data space
 - ✿ Enable applications to discover additional data sources
- ▶ Three types of RDF links
 - ✿ Relationship Links
 - ✿ Identity Links
 - ✿ Vocabulary Links

Relationship Links

- ▶ Point at related things in other data sources
 - ✿ People, places or genes
- ▶ Relationship links enable people to point to background information about the place they live, or to bibliographic data about the publications they have written

On the mound, Wang shows as much emotion as someone taking a nap. Instead of strikeouts, he produces grounders almost as steadily as a coach tapping them to infielders.</p>

Implementation Plan

- ▶ Define your model
 - ✿ URI, resources, relationships
- ▶ Select or define your metadata terms
 - ✿ Terms should be defined using an RDF-based standard (RDF or OWL)
- ▶ Select or define any controlled vocabularies
 - ✿ Each list of terms will be described in an RDF-compatible format (such as SKOS)
- ▶ Create links from your data (terms) to related data (terms) on the Web

The Web of Data has many equivalent URIs.
This service helps you to find co-references
between different data sets.
Enter a known URI, or use Sindice to search first.

LDT @ Library 緣起

在2018年起國內部分圖書館陸續導入了支援Linked Data的自動化系統，部分圖書館開始將編目規則轉換為RDA規範之際，在此趨勢之下使鏈結資源的具像化得以有實現的可能。有鑑於此，國家圖書館與國立臺灣大學圖書館積極合作執行本計畫，旨在承繼先前的成果，整理國內聯合權威資料庫，結合題名、主題資料，製作符合標準之鏈結數據並開發相應的「臺灣鏈結資源系統」平台，以期提供使用者更多元、詳盡的相關資訊。

本計畫旨在建置一個整合的臺灣資料鏈結資源系統，而透過這個臺灣圖書館界可共用共享的系統，使臺灣各領域的學研數據可透過網際網路和國際間各大型語意數據集形成脈絡的串連，呈現使用者更豐富的臺灣資料及更完整的華文研究資源。

Forrest Gump is a 1994 American epic romantic dramedy film based on the 1986 novel of the same name by Winston Groom. The film was directed by Robert Zemeckis and starred Tom Hanks, Robin Wright, Gary Sinise and Sally Field. The story depicts several decades in the life of Forrest Gump, a naive and slow-witted yet athletically prodigious native of Alabama who witnesses, and in some cases influences, some of the defining events of the latter half of the 20th century in the United States; more specifically, the period between Forrest's birth in 1944 and 1982. The film differs substantially from Winston Groom's novel on which it is based, including Gump's personality and several events that were depicted. Filming took place in late 1993, mainly in Georgia, North Carolina, and South Carolina. Extensive visual effects were used to incorporate the protagonist into archived footage and to develop other scenes. A comprehensive soundtrack was featured in the film, using music intended to pinpoint specific time periods portrayed on screen. Its commercial release made it a top-selling soundtrack, selling over 12 million copies worldwide. Released in the United States on July 6, 1994, Forrest Gump received critical acclaim and became a commercial success as the top grossing film in North America released that year, being the first major success for Paramount Pictures since the studio's sale to Viacom earlier in the year. The film earned over \$677 million worldwide during its theatrical run. The film won the Academy Awards for Best Picture, Best Director for Robert Zemeckis, Best Actor for Tom Hanks, Best Adapted Screenplay, Best Visual Effects and Best Film Editing. It also garnered multiple other awards and nominations, including Golden Globe Awards, People's Choice Awards and Young Artist Awards, among others. Since the film's release, varying interpretations have been made of the film's protagonist and its political symbolism. In 1996, a themed restaurant, Bubba Gump Shrimp Company, opened based on the film, and has since expanded to multiple locations worldwide. The scene of Gump running across the country is often referred to when real-life people attempt the feat. In 2011, the Library of Congress selected Forrest Gump for preservation in the United States National Film Registry as being "culturally, historically, or aesthetically significant".

說明：Biography J K (Joanne Kathleen) Rowling was born in the summer of 1965 at Yate General Hospital in England and grew up in Chepstow, Gwent where she went to Wyedean Comprehensive. Jo left Chepstow for Exeter University, where she earned a French and Classics degree, and where her course included one year in Paris. As a postgraduate she moved to London to work at Amnesty International, doing research into human rights abuses in Francophone Africa. She started writing the Harry Potter series during a Manchester to London King's Cross train journey, and during the next five years, outlined the plots for each book and began writing the first novel. Jo then moved to northern Portugal, where she taught English as a foreign language. She married in October 1992 and gave birth to her daughter Jessica in 1993. When her marriage ended, she returned to the UK to live in Edinburgh, where "Harry Potter & the Philosopher's Stone" was eventually completed and in 1996 she received an offer of publication.
